

ENTERGY TEXAS, INC.

Electric Service

RIDER SVRO

Sheet No.: 147

Effective Date: 1-2-25

Revision: 3

Supersedes: 1-2-24

Schedule Consists of: Two Sheets

SMALL VOLUME RENEWABLE OPTION RIDER

I. AVAILABILITY

This Small Volume Renewable Option Rider ("Rider SVRO") is a voluntary Rider available to qualifying customers of Entergy Texas, Inc. ("ETI" or the "Company") taking service under rate schedules Residential Service ("RS"), Small General Service ("SGS"), General Service ("GS"), and Large General Service ("LGS"). Eligible customers must take metered service and be in good standing with the Company. Prior to taking service under this tariff, participating customers must designate a quantity (either the Tier One Option of 25%, the Tier Two Option of 50%, or the Tier Three Option of 100%) of their monthly energy usage ("SVRO Election"), not to exceed 499,999 kilowatt-hours ("kWh") per month, to be matched with renewable energy credits ("RECs").

II. APPLICABILITY

Rider SVRO is for an optional service to customers that voluntarily elect to match a portion of their monthly energy usage with RECs. A REC represents the full suite of attributes of one megawatt-hour ("MWh") of electricity generated and delivered to the electricity grid from a renewable energy source. Service under this Rider provides for the purchase of RECs by ETI and related program costs. The Company will retire all RECs purchased under this Rider on behalf of participating customers. Service under Rider SVRO is in addition to service under other rate schedules that apply to the customer. Service under SVRO does not modify any other applicable rate schedule or provisions for service.

III. TERMS OF SERVICE

A customer may not enroll if it is a party to a deferred payment agreement, has received two or more final disconnect notices, or has been disconnected for non-payment within the last twelve (12) months. ETI may terminate service under this Rider to a participating customer who becomes delinquent in any amount owed to ETI with a twenty-five (25)-day notice of termination.

Service under Rider SVRO will be month-to-month and shall be automatically extended for successive periods of one month each until terminated by written notice given by either ETI or the participating customer not less than twenty-five (25) days prior to the requested date of termination.

If a participating customer terminates service and moves from the Company's service territory, the customer's service under Rider SVRO will be cancelled immediately and without additional notice. If a participating customer moves to a new location within ETI's service area and continues to be eligible for service under Rider SVRO, the customer's service under Rider SVRO will be transferred to such new location unless the customer withdraws from Rider SVRO.

Customers who withdraw from Rider SVRO will not be eligible for service under this tariff until the seventh (7th) billing month following such withdrawal.

(Continued on reverse side)

The Company reserves the right to deny or suspend service under Rider SVRO, or limit the number of RECs provided to each participating customer, until such time that the Company is able to ensure that a sufficient quantity of RECs is available to meet the customer's desired participation level.

A participating customer's SVRO election may be changed no more than one time in a six-month period.

IV. MONTHLY CHARGE

The Rider SVRO monthly charge will be equal to:

SVRO Election x Tier Rate

Where:

1. SVRO Election = The monthly amount of kWh corresponding to the participating customer's Tier Option; and
2. Tier Rate = The rate corresponding to the participating customer's SVRO Election as shown below.

	<u>SVRO Election</u>	<u>Tier Rate (\$ per kWh)</u>
Tier One Option	25%	\$0.000258 per kWh
Tier Two Option	50%	\$0.000258 per kWh
Tier Three Option	100%	\$0.000258 per kWh

On an annual basis, no later than October 1, ETI will file with the Commission the updated Tier Rate for each SVRO Election to be effective with the first billing cycle of the following January billing month. The Tier Rate for each SVRO Election is calculated to be the program costs (customer education and Green-e® certification costs) plus the fixed REC price (calculated as the most recent available 12-month average value using the S&P Global Renewable Energy Credit Index for Texas RECs). The updated Tier Rate for each SVRO Election will also include a true-up that compares the actual costs of RECS purchased by ETI on behalf of participating customers in Rider SVRO to the revenues collected based on the fixed REC price used to develop the rates charged under Rider SVRO for the most recent preceding twelve (12) months. The resulting over- or under-collection will be incorporated into the subsequent updated Tier Rate for each SVRO Election.
